Brightwater Assurance LLP, Financial Services Advisory

Date: 24 September 2026

To: Priya Nair, Payments, for the FCRM change desk

Subject: Scope of the corridor-specific due diligence review of Remesas del Norte S.A., US to Mexico corridor. This letter is a synthetic demonstration document.

1. Engagement and timing

Brightwater Assurance LLP has been engaged by the Payments unit to carry out a corridor-specific due diligence review of Remesas del Norte S.A. Fieldwork is scheduled for 2 to 20 November 2026, with the final report due by 18 December 2026.

2. Scope of the review

The review covers the partner's corridor operations for payouts from the United States to Mexico, including the payout agent network. The network comprises 38 cash-pickup agent locations in 6 states, and the review will test the controls over those locations.

The volume basis for sampling is the Payments unit's forecast of about 62,000 transactions a month by month 6 of the service, which the reviewer will use to size testing.

3. Matters outside the scope

The review does not cover the agents' own customer files. Agents are onboarded and monitored under the Partner's KYC standard v4, and sampling of agent-level KYC files is outside this engagement.

4. Deliverables and timeline

We will issue a written report with findings rated by severity, a management response template and, where we identify gaps, recommended remediation with owners and dates. A draft will be shared with the Payments unit and FCRM before the final report.

5. Assumptions and fees

The estimate assumes access to the partner's premises, records and personnel in Monterrey and at a sample of agent locations. Our fee is a fixed amount agreed separately with the Payments unit.

Yours sincerely,

Brightwater Assurance LLP, Financial Services Advisory
